### Terms

- **KEY/ALM:** Enables the webeyeFOG to be armed and activated separately via a wired input.
- **IMM/PANIC:** Enables activation of the cannister without arming via wired input.
- **TAMPER:** Physical tamper buttons that when activated can send a signal to the Fault Output.
- **FAULT OUT:** Sends a change of state (NC/NO) when an event occurs e.g. tamper or dead cannister.
- **WIRED IN:** The unit can be activated via a wired input.
- **WIRELESS IN:** The unit can be activated by the wireless webeyeFOG addons.
- **WIRELESS OUT:** Can send signals to the wireless webeyeFOG via wireless connection.
- **ADDON:** Requires the wireless webeyeFOG to work, cannot be standalone.
